OBJECTIVE

Software engineer skilled in backend, distributed systems, and scalable architecture. Passionate about building high-impact systems, solving ambiguous problems, and delivering customer-obsessed solutions.

EDUCATION

Matrusri Engineering College Nov. 2022 – May 2026
Bachelor of Engineering in Computer Science and Engineering CGPA: 7.00

EXPERIENCE

Ai Intern - Viswam.ai June 2025 – July 2025

- Designed and developed **end-to-end AI application modules using Python, Streamlit, and LLM APIs**, translating real-world problems into deployable AI solutions through structured workflows.
- Implemented **LLM-powered pipelines for data extraction, analysis, and inference**, working with locally curated datasets and fine-tuned models to improve real-world accuracy and reliability.
- Applied **model evaluation, prompt optimization, and iterative validation techniques** to enhance prediction quality, demonstrating strong ownership of applied AI systems.
- Built and deployed production-ready AI prototypes** as part of the **Summer of AI 2025 program**, showcasing end-to-end development from experimentation to usable applications.

PROJECTS

- Amazon ML Challenge 2024** — *Python, Machine Learning, Feature Engineering, Regex*
Built a scalable **entity extraction pipeline** to convert unstructured e-commerce text into structured attributes. Processed **750MB+ datasets** using optimized regex, unit normalization, and entity resolution for ML readiness.
- Chandhamama Catalogue v2** — *Generative AI, OCR, Streamlit, Google Gemini API, RAG*
Developed a **Visual RAG system** to extract Telugu story metadata and text from scanned magazine archives. Implemented batch processing with **human-in-the-loop validation** and resilient API retry mechanisms.
- NatyaBhoda – AI Dance Learning System** — *Computer Vision, MediaPipe, XGBoost, Streamlit*
Built a real-time **gesture recognition pipeline** to classify Kuchipudi hand mudras using pose estimation. Deployed a low-latency app enabling **live inference and feedback** for AI-assisted dance learning.

TECHNICAL SKILLS

- Languages:** Python, C, JavaScript, SQL, HTML
- AI / Machine Learning:** Generative AI, LLMs, Retrieval-Augmented Generation (RAG), Feature Engineering, Prompt Engineering, Model Evaluation
- Computer Vision:** MediaPipe, Pose Estimation, OCR, Visual Inference
- Frameworks & Libraries:** PyTorch, Scikit-learn, XGBoost, Hugging Face Transformers
- Backend & APIs:** Flask, FastAPI, Express.js, REST APIs, JWT Authentication
- Databases:** PostgreSQL, MongoDB, Vector Databases
- Web & Tools:** Streamlit, React.js, Git, Docker
- Data Processing:** Pandas, NumPy, Regex, Large-scale Data Cleaning

ACHIEVEMENTS AND CERTIFICATIONS

- Ranked Top 40% (Under 1200 out of 3000 teams)** in the **Amazon ML Challenge 2024**, competing on large-scale real-world machine learning problems.
- Student Coordinator – Smart India Hackathon (SIH) 2025**, recognized with a Certificate of Appreciation for seamless event coordination and execution.
- PHP & MySQL Certification (4 Credits)** – Spoken Tutorial Project, IIT Bombay.
- RDBMS PostgreSQL Certification (Score: 85%)** – Spoken Tutorial Project, IIT Bombay.
- Python Certification (4 Credits)** – Spoken Tutorial Project, IIT Bombay.
